YOUR PATH TO A GREENER YARD

7 STEP LAWN CARE PROGRAM

- 1. Early Spring Application:**
Includes our custom slow-release fertilizer to feed your lawn for up to 16 weeks. It also includes the first of two crabgrass preventer applications.
- 2. Late Spring Application:**
Includes weed control to target nasty weeds such as dandelions. This is the second crabgrass preventer application and the 1st round of moisture manager to help retain soil moisture for coming Hot and dry Conditions.
- 3. Early Summer Application:**
- 4. Grub Control Application:** 
DOUBLE APPLICATION
2nd Moisture manager to help retain soil moisture during our hot Kansas Summers with a summer slow-release Fertilizer. At the same time, you will receive the Grub application with this round.
- 5. Late Summer Application:**
3rd Moisture manager to help retain soil moisture with a slow -release fertilizer and weed control. Nutsedge, crabgrass, dandelion and many other summer weeds can sneak into your lawn and this application will clean them up.
- 6. Fall Application:**
Fall is one of the most important times to fertilize your lawn. Our fertilizer will help the lawn green up and recover from the stress of summer. We will spot spray for weeds at this time.
- 7. Winter Application:**
Late Fall/early Winter fertilizer application is another important time of year to fertilize your lawn. Keeping it healthy and greener longer over the winter months. It also provides a faster green-up the following Spring.
