

IRRIGATION

By installing efficient irrigation products in your landscape, you are ensuring healthy growth and minimal water use.

HYDRAWISE – the Most Complete Wi-Fi Irrigation Control System.

Save up to 50% on water bills

PREDICTIVE WATERING – uses weather data from local weather stations to adjust watering. Rain, wind, and temperature determine how much water the smart controller will apply.

**Save up to 50% water
with Predictive Watering™**

DRIPLINE/DRIP ZONE KIT – Converting from sprays to drip irrigation provides slow, even watering with no overspray. For landscape beds and planters, convert from sprays to drip irrigation.

save up to 70% water

Installing an Automatic Irrigation System:

- Protects your investment in landscaping
- Increases your property value
- Eliminates the hassles of hand watering
- Incorporates watering schedules
- Maximizes water efficiency

PREMIER

LANDSCAPE CONSTRUCTION AND MAINTENANCE

Update your irrigation system, **SAVE WATER & MONEY**

Consider replacing older spray nozzles and heads with MP Rotators. MP Rotators/ Pressure Regulated Spray Bodies: Apply water slowly so it can be absorbed into the soil without wasteful runoff. Proper pressure allows optimal performance. Replace inefficient sprays with MP Rotators

save up to 30%

For over 20 years, Premier has proudly served the Greater Wichita area as pioneers of water conservation and irrigation service. Repairs, alterations and seasonal maintenance has been our trade. Licensed in backflow tests, start ups and winterizations.
